Engineering workshop questionnaire

1. How often do you check your tools before starting a task?

0: Never

1: Sometimes

2: Often

3: Always

2. Which instrument measures electrical resistance?

A) Thermometer

B) Ohmmeter

C) Stopwatch

Correct answer: B

3. A circuit breaker can interrupt the flow of current.

A) True

B) False

Correct answer: A

4. Name the unit used to measure electrical resistance.

Correct answer: Ohm

5. Match each component with its function.

A) Switch -> Opens or closes a circuit

B) Fuse -> Protects against excess current

Correct answer: Switch=Opens or closes a circuit, Fuse=Protects against excess current
